Model UCL-HTE25

Coaxial Fixed Termination

25 Watts DC-10GHz

Coaxial fixed terminations absorb RF& microwave energy and are commonly used as dummy loads of antenna and transmitter. They are also used as match ports in many multiport microwave device such as circulator and directional coupler to make these ports which are not involved in the measurement be terminated in their characteristic impedance in order to ensure an accurate measurement.

UCL-HTE25 coaxial fixed termination's average power 25W, frequency range from DC-10GHz and the features include wide frequency band, low VSWR, excellent capacity in anti-pulse and anti-burnout etc.
